Subject: RE: Warren steel Holdings (WSH)

Steve:

The document you included is the Copperweld Property Management Plan (PMP). The PMP is directed towards the former Copperweld landfills (EAF and Rubbish) and the pickle liquor lagoons management. There is a distinction between WSH and Copperweld work. The Copperweld work involves the on-going remedial issues associated with the landfills and lagoons.

For the WSH site, the State had operated the WWTP and monitored the associated wastewater lagoons; sampled some of the piles located west of the Melt Shop; sampled, characterized and disposed of two piles of lime and mill scale (~50 tons) located west of Ohio Star Forge; and will continue on-going compliance and enforcement activities.

Contact me if you would like to discuss further.

Thanks, Frank

Subject: Warren steel Holdings

Hi Frank,

I am working with Jason Cashmere on the Action Memo for the site for the items we discussed (drums/totes/etc)

There is a section in it for

“State and Local Actions to Date” as well as “Potential for Continued State and/or Local Response”

I know OEPA is still performing work out there – is there a summary you can give me or if I summarize the attached document – would it capture everything?

Thanks,

Steve Wolfe
